OVERVIEW

NEW DEVELOPMENTS

Families discover a mesmerizing new world created especially for them on the Disney Wish. The fifth ship in the Disney Cruise Line fleet is a celebration of Disney's rich legacy of enchanting storytelling that brings to life the fantastical worlds and beloved characters at the heart of Disney, Pixar, Marvel and *Star Wars* adventures like never before.

Families can embark on a splashtacular adventure with Mickey Mouse and Minnie Mouse aboard the first-ever Disney attraction at sea; revel in a royal celebration during a theatrical dining experience with *Frozen* friends; team up with the Avengers on a Marvel cinematic dining adventure; and travel to a galaxy far, far away in a first-of-its-kind *Star Wars* experience on a Disney ship.

The Disney Wish is the first of three new Disney Cruise Line ships being built at the Meyer Werft shipyard in Germany through 2025. All three ships will be powered by liquefied natural gas and, at approximately 144,000 gross tons, will be slightly larger than the Disney Dream and Disney Fantasy.

COMMUNITY INVOLVEMENT

Disney Cruise Line strives to make a positive impact in the many places around the world it calls home. The cast and crew of Disney Cruise Line support numerous charitable organizations that nurture the lives of children and enrich the environment. Crew members lead reading education programs in schools, give to local animal shelters and bring Disney characters to entertain children in port communities around the globe. Disney VoluntEARS also donate their time to paint murals for hospitals and care facilities, raise funds for worldwide disaster relief efforts, and host annual shore cleanups to remove trash and debris from fragile coastlines. Each year, cast and crew members donate thousands of hours of their personal time to benefit worthwhile causes in port communities around the world.

THE ENVIRONMENT

Disney Cruise Line is committed to minimizing its impact on the environment by utilizing new technologies and ongoing programs to increase fuel efficiency, reduce waste and promote conservation worldwide.

🌿 **Reducing Plastic Waste:** As part of The Walt Disney Company's overall efforts to reduce the amount of single-use plastics, Disney Cruise Line has taken great measures to eliminate single-use plastics onboard and on Disney Castaway Cay, Disney's private island in The Bahamas. In 2018, Disney Cruise Line eliminated the use of plastic straws, removing an annual volume of more than 14.7 million. Additionally, by switching to refillable bath product dispensers in all guest staterooms in 2019, Disney Cruise Line has removed an annual distribution of more than 2.2 million plastic amenity containers across its fleet – a total of 18 tons of plastic waste. Disney Cruise Line has also gone from annually distributing nearly 1 million plastic merchandise bags fleetwide annually to nearly zero. Other measures include the removal of plastic cutlery, stirrers and condiment packets. Disposable polystyrene cups have also been replaced with insulated paper cups. And, in an effort to reduce the use of plastic bottles, refillable water stations have been installed in both guest and crew member areas.

🌿 **Recycling:** Disney Cruise Line is committed to diverting waste from traditional waste streams. Shipboard recycling processes have helped to eliminate on average more than 2,500 tons of metals, glass, plastic and paper from traditional waste streams each year. Each stateroom on all four Disney Cruise Line ships contains a recycling bin for plastic, paper and aluminum.

🌿 **Fuel Efficiency:** As of Jan. 1, 2020, the International Maritime Organization instituted a regulation that requires all ships to use .5% sulfur fuel compared to 3.5% previously. Disney Cruise Line has taken this a step further by using .1% low sulfur fuel fleetwide at all times. Additionally, all three new ships will be powered by liquefied natural gas, or LNG, one of the cleanest-burning fuels available.
