## ◀ DISCOVERY ISLAND ▶

### ANIMAL SEARCH CHECKLIST

Find some of these animals represented among the carvings on the Tree of Life.

#### OTTERS ASIAN SMALL-CLAWED OTTERS

*Zootopia* Character Emmitt Otterton

#### FUN FACTS:

- Otters have two layers of fur to help keep them warm and dry.
- Otters belong to the same family as ferrets, weasels and badgers.
- Otters range in size from the Asian small-clawed otter at around 2-3 feet up to the giant river otter, which can be 6 feet long!

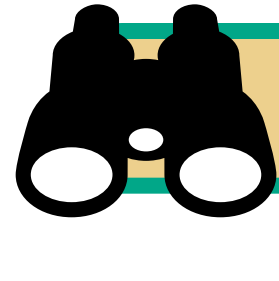

#### DISCOVERY ISLAND:

### TREE OF LIFE

#### WALRUS

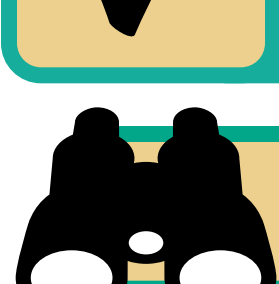

Residents of Marsh Market in *Zootopia 2*

#### FUN FACTS:

- Walruses use their long tusks like ice picks or ski poles, to help them grip ice and pull themselves out of the water. They can also use their tusks to protect and defend themselves.
- Walruses' stiff, sensitive whiskers help them to sense their surroundings and feel for food on the ocean floor.
- Sea ice is important for walruses. They use ice floes as resting spots and diving platforms when searching for food.

#### POLAR BEAR

Residents of Tundratown in *Zootopia: Better Zoogether!*

#### FUN FACTS:

- Polar bears have thick layers of fat to help stay warm in the water while swimming!
- Polar bears' huge, webbed feet help them walk safely on snow and ice. Their flippers are good paddles for swimming.
- The scientific name for polar bears is *Ursus maritimus*, means "sea bear," perfect for these great swimmers who are at home on the sea ice.

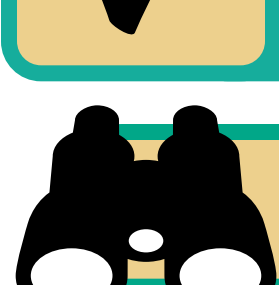

#### ASIA:

### MAHARAJAH JUNGLE TREK

#### TIGER

Tigers are **Gazelle's** backup dancers in *Zootopia: Better Zoogether!*

#### FUN FACTS:

- Unlike most cats, tigers are good swimmers and will often go into water.
- Tigers don't just roar, they can make other sounds, including a quiet "chuff" sound used as a greeting.
- Here at Disney's Animal Kingdom, you can see Bakso, a one-year-old Sumatran tiger born and raised here at the park!

AFRICA:

## KILIMANJARO SAFARIS

### ANIMAL SEARCH CHECKLIST

#### SPRINGBOKS

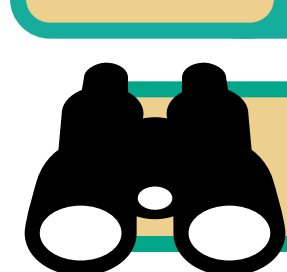

A type of antelope and close relative to **Gazelle** in *Zootopia*

#### FUN FACTS:

- With their graceful legs and slender bodies, you can tell springboks are close relatives of gazelles!
- Both male and female antelopes, which includes gazelles and springboks, have horns.

#### CHEETAHS

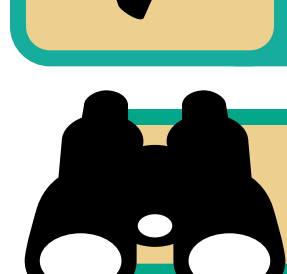

*Zootopia* Character **Benjamin Clawhauser**

#### FUN FACTS:

- Cheetahs are the fastest land mammals and can sprint up to 60 miles per hour.
- Cheetahs' claws never fully retract; they are like cleats gripping the ground as they run.
- You can tell a cheetah by its spots: they are solid, while leopard and jaguar spots are rosettes.

#### AFRICAN ELEPHANTS

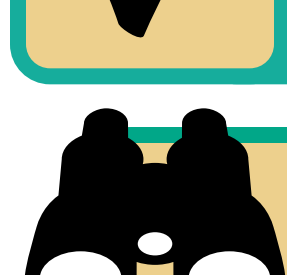

See elephants among the denizens of *Zootopia*

#### FUN FACTS:

- Elephants use many different sounds to talk to each other, including some that are too low for humans to hear!
- One elephant can eat hundreds of pounds of food and drink up to 50 gallons of water each day.
- Elephants are intelligent and have a strong memory, which helps them keep track of the best places to find food and water.

#### GIRAFFES

See giraffes among the denizens of *Zootopia*

#### FUN FACTS:

- Giraffes have seven neck bones, just like people, but their necks can be over 6 feet long!
- Each giraffe has its own unique coat pattern just like human fingerprints.

### ANIMAL SEARCH CHECKLIST

#### AFRICAN SPINY MICE

See rodents like these in the neighborhood of **Little Rodentia**

#### FUN FACTS:

- Mice and rats are part of a large group of animals called rodents, along with squirrels, prairie dogs and guinea pigs.
- There are hundreds of different species of mice found around the world!
- Like other rodents, mice have front teeth that continuously grow.

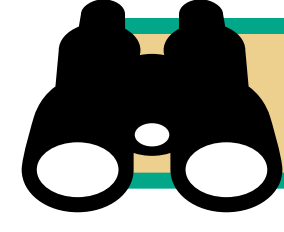

AFRICA:

## Rafiki's PLANET WATCH

### AFFECTION SECTION

#### GOATS

See goats among the denizens of *Zootopia*

#### FUN FACTS:

- Goats are very social animals, preferring to live in groups.
- Goats will sometimes butt heads – literally – to settle disputes, but sometimes just to play!

#### PIGS

See pigs among the denizens of *Zootopia*

#### FUN FACTS:

- Pigs use their sensitive snouts to find food, like roots and tubers, underground.
- Pigs can be found on every continent except Antarctica.

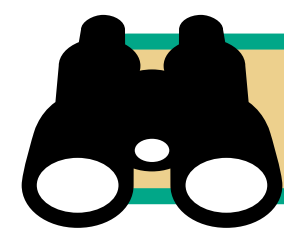

### CONSERVATION STATION

#### SNAKES

PUERTO RICAN BOA, DESERT ROSY BOA AND GREEN TREE PYTHON

*Zootopia 2* Character **Gary De'Snake**

#### FUN FACTS:

- Snakes can be found in all kinds of places, from the dry, sandy desert to lush rainforests.
- A snake's forked tongue collects particles from the air, which helps the snake learn more about its surroundings.
